

# Staebel Total Flow Plus Bariatric Active Air Mattress

staebel 

Product Code: 3202301

# Designed to deliver a cost-effective solution for the prevention of pressure injuries for high-risk individuals in aged care and community settings.

The Staebel Total Flow Bariatric Plus Mattress is a full replacement alternating mattress system designed as a cost-efficient solution. With cell-on-cell air cells, a static base section, and an in-use height of 10", the Staebel Total Flow Bariatric Plus Mattress is effective in the prevention of pressure injuries. The mattress has been designed for bariatric individuals at very-high risk of developing pressure injuries in the acute, residential care, and home environments.

With a simple to use digital design, this mattress enables the carer to quickly set up the mattress system and have it operating at optimal pressure for specific weights. The Staebel Total Flow Bariatric Plus incorporates technology with constant auto-pressure sensing through an air sensor and microcomputer regulator to provide ultra-low interface pressure, promoting an even ambience for natural sleep patterns. The design additionally supports the microclimate by having micro air-loss cells within the torso region.

## Product Features:

- Nylon TPU independently removable cells
- Cell-on-cell design to prevent bottoming out and increase stability when the alternating mode is active
- Remote control to enable independence
- Pillow function/static head cells
- CPR quick release tag & anchoring straps
- Multi-stretch, antimicrobial, machine washable, waterproof & vapour permeable PU cover
- Micro-air loss cells in the torso region to support microclimate management
- Transport Mode
- Warranty: Mattress - 12 months, Pump - 24 months
- Standard: ISO 9001:2015 | ISO 13485:2016

## Pump Features:

- Cycle Time: 10, 15, 20, 25 minutes
- Control panel lock to prevent unauthorised or accidental tampering
- 20-minute automatic timer for max inflate mode to reduce risk of prolonged max inflation
- Memory function in the case of a power outage
- Air Output: 8 litres/minute
- Power Input: AC220-240V, 50-60Hz
- Power Consumption: 7W
- Fitted with hanging brackets
- Dimensions (WxLxH): 240 x 345 x 125 mm
