

# Staebel Relax GelCell G2 Cushion

staebel 

Product Code: 353GC2

# A cushion with a inique combination of AIR and GEL technology for high user comfort & relief.

A unique combination of AIR and GEL technology effectively provides pressure relief and comfort to the high risk user. The action of the air in the cushion enhances capillary function in the skin, maintaining blood flow and oxygen uptake. When pressure is applied, air circulates to each of the cells, distributing weight evenly, thus reducing high pressure concentrations around bony prominences.

- Unique combination of AIR and GEL technology effectively provides pressure relief and comfort to the high risk user
- Consists of 48 interconnected cells, each covered with a layer of pressure relieving silicone-based TruGel for ultimate pressure relief.
- Silicone gel is impact dampening

- When pressure is applied, air circulates to each of the cells, distributing weight evenly, thus reducing high pressure concentrations around bony prominences
- The Gelcell is made up of 3 layers of polyurethane (PU) film making it highly durable and difficult to puncture.
- Suitable for high to very high risk users
- Lightweight and easy to transport
- Includes outer cover, First Aid Kit and Pump

### Air cushion enhances capillary function:

- enhances pressure re-distribution
- minimises the effects of shear forces
- has a positive effect on skin temperature
